The 2010 Kampala Amendments to the Rome Statute have paved the way for the International Criminal Court to prosecute the 'supreme crime' under international law: the crime of aggression. This landmark commentary provides the first comprehensive analysis of the history, theory, legal interpretation and future of the crime of aggression after Kampala. As well as explaining the positions of the main actors in the negotiations, the authoritative team of leading scholars and practitioners set out how countries have themselves criminalized illegal war-making in domestic law and practice. In light of the anticipated activation of the Court's jurisdiction over this crime in the very near future, this work offers, over two volumes, a meticulous legal analysis of how to understand the material and mental elements of the crime of aggression as defined at Kampala. Alongside *The Travaux Préparatoires of the Crime of Aggression* (Cambridge, 2011), this commentary provides the definitive resource for anyone concerned with the illegal use of force
